PROFESSIONAL SUMMARY

Startup-oriented Full-Stack & AI Engineer with hands-on experience building production-grade, real-time web applications using MERN Stack, Flask, and modern cloud technologies. Proven track record of leading cross-functional hackathon teams to Top 5 and Top 10 finishes at national-level competitions. Skilled in scalable MVP execution, AI integration (LLMs, NLP, STT), and real-time systems across healthcare AI, compliance automation, and hyperlocal commerce domains.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML/CSS

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Flask, FastAPI

Database: MongoDB, PostgreSQL, MySQL, Supabase

AI/ML: Prompt Engineering, OpenAI Whisper (STT), BioBERT, BERT NER, Isolation Forest, LLM Integration

Cloud & Tools: Socket.IO, Redis, Razorpay, AWS, Vercel, Render, Docker, Git, GitHub, REST APIs

PROJECTS

VendorVue — Hyperlocal Vendor Operating System

Live: vendor-vue-xi.vercel.app

- Architected a real-time hyperlocal vendor platform supporting 100+ concurrent sessions with live order tracking, OTP-based pickups, vendor dashboards, and payment workflows using Next.js, Node.js, Flask, PostgreSQL, Redis, and Socket.IO.
- Reduced order update latency by ~40% via bi-directional Socket.IO synchronization, optimizing backend workflows for scalable concurrent requests.
- Designed a responsive mobile-first UI/UX focused on rapid ordering workflows, cutting average order placement time significantly.

DPDP Act Compliance & Network Data Flow Mapper

- Built an AI-assisted compliance automation system using BERT NER for PII detection across unstructured documents and Isolation Forest for network anomaly identification with ~85% detection accuracy.
- Engineered compliance reporting workflows aligned with India's DPDP Act, reducing manual audit review time by an estimated 60% through automated risk flagging and structured reporting.

Aalok Solar Dashboard

- Developed a responsive solar monitoring dashboard with real-time plant analytics, secure Supabase authentication, protected routes, and client-facing operational insights using React.js.
- Delivered a scalable frontend architecture enabling rapid onboarding of new solar plant clients with minimal configuration overhead.

EXPERIENCE & HACKATHONS

Full Stack Developer — Team CORELOOP | SunHacks 2K26

2 Weeks | National Hackathon

- Led full-stack development of VendorVue, a scalable vendor operating platform for hyperlocal commerce digitization and real-time order management.
- Integrated Socket.IO, PostgreSQL, Redis, and Razorpay payment systems into a unified backend workflow handling real-time events.
- **Achievement: Top 10 Team** recognition among all participating national-level teams.

Frontend Developer — GDG Hacker Cup 2026

2 Weeks | National Hackathon

- Developed AI-powered healthcare triage workflows using React, FastAPI, OpenAI Whisper STT, and BioBERT NLP for intelligent symptom parsing and patient prioritization.
- **Achievement: Top 5 — Best AI Track** recognition at the national level.

React Developer — Dyulabs (Freelance)

2024

- Implemented Supabase authentication systems and responsive frontend workflows for the Aalok Solar Dashboard, delivered as a client-facing production platform.

EDUCATION

Bachelor of Technology (B.Tech) — CSE-IEP (Oracle Specialization)

2024 – 2028

Parul University, Vadodara, Gujarat

CERTIFICATIONS

- Oracle Certified Foundations Associate (Java) — Oracle University, 2025
- Blueprint 6.0 — IIT Delhi, 2025
- Dev Heat Hackathon — IIIT Surat, 2025
- Changethon — IIT Roorkee, 2026

ACHIEVEMENTS

- Participated in the 6th Edition Smart Gujarat Hackathon for AI-powered RFP/Tender Automation, representing Parul University.
- Led a 4-member cross-functional team across frontend, backend, AI/ML, and presentation tracks during national hackathons, achieving Top 5 and Top 10 finishes.
- Built and deployed 3+ production-grade AI and real-time systems across healthcare, compliance automation, and hyperlocal commerce domains.
